

NOVACHEM CORPORATION

Final destination in metal pre treatment

Precision Chemistry for Surface Excellence

- **Executive Summary**

Founded in 2000, NOVACHEM CORPORATION is a leading specialist in the formulation and supply of high-performance metal pre-treatment chemicals. We provide the critical foundation for industrial finishing, ensuring that every metal surface is perfectly prepared for coating, bonding, and long-term protection against the elements.

- **Our Core Mission**

To empower manufacturers with innovative chemical solutions that enhance product life span, reduce environmental impact, and optimize process efficiency.

- **Our Specialized Product Range**

We offer a comprehensive suite of chemistries tailored for steel, aluminium, and galvanized surfaces:

- **A range of Degreasing Products**

Products	Application
Nova klin 333	Alkaline cleaners for MS
Nova klin 477	Alkali cleaner for ferrous and non ferrous material
Nova klin Em	Acidic cleaner for MS
Nova Al cleaner	Acidic cleaner for Aluminum parts

- **A range of derusting products**

Products	Application
Nova Pik 729	For MS sheet/Casting
Nova Pik 225	For CR/HR sheet

- **A range of coating refinement/modifier products**

Products	Application
Nova Mod-90	Ti based refining agent for activation prior to phosphating process
Nova Mod 72	Without Ti based refining agent for activation prior to phosphating process

NOVACHEM

CORPORATION

Final destination in metal pre treatment

- **A range of Bonding and coating zinc phosphate**

Products	Application
Nova Phos - 4050	Micro crystalline smooth refined coating for paint/powder coat on ferrous products.
Nova Phos 8190	Calcium modified low weight process for compact smooth coating for paint/powder coating
Nova Phos ZH	Heavy Zinc phosphate for fasteners, autoparts, for heavy coating
Nova Phos MH	Phosphate for rotating parts like gear, wheels, shaft for lubrication and resistance against ware and tare
Nova Phos TWD	For mild steel wire and tube drawing
Nova clean coat	For MS sheet products working as 3 in 1
Nova Phos GS	Cleaning property for GI sheets products

- **A range of Passivation products**

Products	Application
Nova Pas 36	Chrome base passivation for inplant protection
Nova Pas 81	Non Chrome base passivation for inplant protection

- **A range of Chromating process**

Products	Application
Nova chrom Y	For GI sheets, Aluminum Products with golden clour
Nova chrom G	Chorm phosphate coating for Aluminum products with green colour

• **Why Partner With NOVACHEM ?**

In a competitive market, we distinguish ourselves through a "technical-first" approach:

* Custom Formulations: We don't just sell off-the-shelf products. We analyze your water quality and line speed to customize the chemistry.

* Cost Optimization: Our chemicals are designed to operate at lower temperatures and concentrations, reducing your energy and utility bills.

* Regulatory Compliance: We stay ahead of REACH and environmental regulations, offering biodegradable and heavy-metal-free alternatives.

* On-Site Support: Our technical engineers provide regular bath analysis and operator training to ensure zero-defect production.

NOVACHEM

CORPORATION

Final destination in metal pre treatment

> **"The quality of the finish is only as good as the preparation beneath it. We ensure that foundation is unbreakable."**

> Industries We Serve

Our solutions are trusted across diverse high-stakes sectors:

- * Automotive: Body-in-white and component pretreatment.
- * Appliances: White goods and HVAC housing.
- * Architecture: Aluminum profiles and facade cladding.
- * General Industry: Electrical panels, furniture, and heavy machinery.
